

Newborn Screening Virtual Education Series: Hemoglobinopathies and Endocrine Disorders

Tuesday, September 10, 2019 • 12 to 1 p.m.

Teleconference via VIDYO (Vidyo Link and Instructions sent upon registration)

Overview, Target Audience and Learner Outcome

This activity, designed for the primary care providers and interdisciplinary healthcare teams will include a review of current newborn screening disorders screened by the Colorado Newborn Screening Program for Colorado and Wyoming. In addition to a presentation from content experts, attendees will participate in case study review and discussion to provide direction on clinical practice. As a result of this activity, learners will be able to apply new knowledge to ensure current, evidence-based care to their pediatric patients with positive newborn screens.

Objectives

Upon completion of this session, participants should be able to:

- Describe disorders currently screened for on the Colorado state newborn screening panel and understand the clinical follow-up and care considerations for the various disorders.
- Understand the role primary care providers and interdisciplinary healthcare teams have in identifying and providing management for infants with disorders on the newborn screening panel.

Faculty from Children's Hospital Colorado / University of Colorado

Rachel Nuss, MD
Professor
Pediatrics-Heme/Onc and BMT
Colorado Sickle Cell Treatment and Research Center
