

We are genetics professionals, consumers, family members, public health professionals, pediatricians, and primary care providers who are passionate about improving access to genetics care in the Mountain States region for all children.

We encourage everyone to be on a first name basis with everyone else in MSRGN. No titles needed.

**First Name
Basis**

Everyone is Integral and Equal

Each and every person regardless of role is regarded as an integral and equal partner of the Mountain States Regional Genetics Network. Everyone's opinion counts.

Active and Transparent Dialog

We encourage active participation, transparency, and respectful dialog. We have all had different journeys and each and every person's perspective is important. Listen, share, and be respectful of all. We need all our voices and perspectives to move forward.

Family Comes First for Us ALL

The projects, meetings, and work of MSRGN should be prioritized in respect to the well-being of one's family, with a family first focus.

Consumer Engagement

We strive to have at least one consumer involved in each and every MSRGN activity, as lived-experience is valued by Mountain States.
