State Team Activity To Date

- Virtual Education Series
- New Family Roadmap
- Transition Roadmap

Experiences as a State Team

- The collective experiences of our team really drive us to what our goals and destinations are.
- Keep looking ahead out the front windshield, but also remember to check sideview mirrors for different perspectives and rearview mirrors for lessons learned.
- Just when you think things are on cruise-control, you hit an unexpected bump or roadblock. Sometimes you need to take another route to your destination.

Time 4 Genetics: Clinic & Location

- Family Practice Residency Programs
 - 11 programs across the state
 - 4-10/ class = 12-30 per program
 - Programs geared towards caring for patients and families across their lifespan often in underserved settings (i.e. rural, urban, or community health)
